

FAQIH PRATAMA MUHTI

Software Engineer · Backend Developer · Full Stack Developer

Depok, West Java, Indonesia | faqihpratamamuhti@gmail.com

GitHub: github.com/programmerShinobi | LinkedIn: linkedin.com/in/faqihpratamamuhti

PROFESSIONAL SUMMARY

Software Engineer specializing in backend and full stack development with Node.js, NestJS, Spring Boot, and PostgreSQL. Experienced in building and modernizing aviation operational systems, optimizing APIs and databases, and remediating security findings from penetration tests. Strong ownership, structured problem-solving, and effective collaboration with technical teams and business users to deliver reliable software.

CORE COMPETENCIES

Backend Development · Full Stack Development · Enterprise Application Development · Legacy System Modernization · REST API · GraphQL · Database Design · Database Optimization · System Integration · Security Remediation · Production Issue Resolution · Agile Development · Cross-functional Collaboration

PROFESSIONAL EXPERIENCE

Backend & Full Stack Developer

OpenCloud | Nuxatech — GMF AeroAsia Project

July 2023 – Present
Tangerang, Banten, Indonesia

- Develop, maintain, and enhance enterprise aviation web applications spanning maintenance, technical publications, project management, emergency response, and aircraft health monitoring.
- Build backend services and application features with NestJS, Spring Boot, PostgreSQL, Prisma ORM, REST API, GraphQL, and Angular.
- Modernize legacy systems into maintainable, scalable web-based platforms and resolve critical production issues to improve system stability and API/database performance.
- Lead security remediation of penetration-test findings, including critical findings from the BSSN security assessment, to harden enterprise applications.
- Design cross-database integration using PostgreSQL Foreign Data Wrapper to connect PostgreSQL with MSSQL and MySQL databases.
- Collaborate with developers, business users, and operational teams to deliver solutions, and support DevOps ticket management, issue tracking, and troubleshooting.

SELECTED PROJECTS

Aircraft Health Index (AHI) — Built and maintained the AHI aviation-monitoring application (NestJS, Prisma ORM, PostgreSQL); led security hardening from BSSN penetration-test findings and improved backend reliability.

E-Techpub — Modernized a legacy Technical Publications system into a structured, scalable platform using Spring Boot and PostgreSQL.

Excellent Operations (XOPS) — Built an aircraft-maintenance operations platform (NestJS, PostgreSQL), digitizing operational workflows through backend development and database design.

Project Management (XPREAM) — Developed a project-management and route-planning application in Angular, supporting enterprise planning and operational visibility.

Incident Emergency Response — Resolved critical bugs and optimized GraphQL queries and database interactions, improving backend reliability and responsiveness for the mobile app.

OLAPS & Electronic Logbook — Stabilized the OLAPS web application and delivered the electronic Logbook feature, replacing manual logbook processes with a digital workflow.

UI/UX Designer — Volunteer

Saqinah.id

September 2023 – November 2023
Jakarta, Indonesia

- Designed and prototyped user-centric web interfaces using modern UI/UX principles, improving user flows and interface clarity in collaboration with stakeholders.

IT Analyst & Programmer — Intern

Karawang Regency Archives and Library Department

June 2019 – July 2020
Karawang, West Java, Indonesia

- Helped design and build an internal library management system using CodeIgniter and MySQL, contributing to system analysis and database design.
- Automated manual administrative processes to improve archival and library operational efficiency.

EDUCATION

Bachelor's Degree in Computer Science

Buana Perjuangan University, Karawang, West Java, Indonesia

October 2018 – July 2022
GPA: 3.85 / 4.00

CERTIFICATIONS & AWARDS

- Best Graduate Award — Faculty Level
- Certified Programmer

TECHNICAL SKILLS

Programming Languages	JavaScript, TypeScript, Java, PHP, C++
Backend Technologies	Node.js, NestJS, Spring Boot
Frontend Technologies	Angular, React.js, Next.js
PHP Frameworks	Laravel, CodeIgniter
Databases	PostgreSQL, MySQL, Microsoft SQL Server
ORM & Database Tools	Prisma ORM, TypeORM, Sequelize, Foreign Data Wrapper
API Technologies	REST API, GraphQL, Swagger/OpenAPI
Cache & Search	Redis, Elasticsearch
DevOps & Tools	Docker, Git, GitHub, Bitbucket, Figma
Methodologies	Agile, Scrum
Operating Systems	Linux, Windows
