

FAQIH PRATAMA MUHTI

Software Engineer

faqihpratamamuhti@gmail.com | github.com/programmerShinobi | linkedin.com/in/faqihpratamamuhti

Depok, West Java, Indonesia

Summary

Experienced software engineer specializing in backend development with strong expertise in Node.js and modern system architecture. Proven ability to enhance system functionality, improve security compliance, and optimize performance across large-scale applications. Effective collaborator with demonstrated success in both team environments and independent projects.

Experience

Backend & Full Stack Developer

GMF AeroAsia (OpenCloud | Nuxatech) | Tangerang, Banten, Indonesia

July 2023 - Present

- Transformed legacy Technical Publications system into modern E-Techpub platform using Spring Boot and PostgreSQL
- Built Excellent Operations (XOPS) for aircraft maintenance using NestJS and PostgreSQL
- Built Project Management (XPREAM) for advanced route planning using Angular Framework
- Implemented Aircraft Health Index (AHI) web application and comprehensive security overhaul addressing critical findings from national security agency (BSSN) penetration test using NestJS Framework, Prisma ORM and PostgreSQL
- Enhanced Incident Emergency Response (IERApps) mobile application through critical bug fixes and GraphQL/database optimization
- Improved stability of OLAPS web applications by resolving critical bugs and implementing electronic Logbook (e-Logbook) feature
- Designed Foreign Data Wrapper (FDW) solution integrating PostgreSQL with MSSQL and MySQL databases
- Manage ticket management services related to DevOps

UI/UX Designer (Volunteer)

Saqinah.id | Jakarta, Indonesia

September 2023 - November 2023

- Designed and prototyped user-centric interfaces for web platforms using modern design principles
- Improved user journey and increased engagement through intuitive interface design

IT Analyst & Programmer (Intern)

Karawang Regency Archives and Library Department | Karawang, West Java, Indonesia

June 2019 - July 2020

- Contributed to design and implementation of library's internal system using CodeIgniter and MySQL
 - Improved archival management efficiency through automated processes
-

Education

Bachelor of Computer Science

Buana Perjuangan University | Karawang, West Java, Indonesia

October 2018 - July 2022

GPA 3.85 / 4.0

Certifications

- Certified Programmer with extensive software development experience
 - Best Graduate Award at Faculty Level
-

Technical Skills

- **Programming Languages:** C++, Java, JavaScript, TypeScript, PHP
- **Backend Frameworks:** Spring Boot, NestJS
- **Frontend Frameworks:** NextJS
- **PHP Frameworks:** Laravel, CodeIgniter
- **Databases:** PostgreSQL, MySQL, Microsoft SQL Server
- **ORM Technologies:** TypeORM, Sequelize, Prisma
- **Cache & Search Technologies:** Redis, Elasticsearch
- **API Technologies:** GraphQL, REST API, Swagger/OpenAPI
- **DevOps Tools:** Docker, GitHub, Bitbucket, Figma
- **Methodologies:** Agile, Scrum
- **Operating Systems:** Linux, Windows
